WILL BE PROVIDED

Kentucky River Foothills  
Development Council, Inc.

## PLEASE JOIN KENTUCKY RIVER FOOTHILLS AS WE CELEBRATE THE GRAND OPENING OF THE NEW HEALTH AND WELLNESS CENTER IN CLAY CITY

Since 2005, KRFDC has been providing a wide array of health care and related services to Powell County and surrounding areas from a 40-foot mobile health clinic that travels between Powell and Estill counties. This program, called Healthcare for the Homeless, or HCH, has outgrown its capacity and recently constructed a permanent building at 108 12th Street in Clay City, KY.

Funded by the U.S. Department of Health and Human Services, the HCH program takes medical care out of the traditional clinical setting and brings it to a population in need of health services. This new facility was built with Construction Improvement Project funding through the American Recovery and Reinvestment Act (ARRA), commonly referred to as the "stimulus plan." KRFDC received \$309,000 to build this new facility and will continue to receive yearly operational funding to provide program services.

The new, 3,000 square foot, facility will contribute to the improved efficiency and quality of care of the clinic by increasing its number of exam rooms from two to four which will reduce the wait for scheduled appointments.

Among the services that will be provided at the new clinic are health exams, immunizations, medications, and referrals. The program also offers through on-site services or via referrals, mental health services, limited oral health screening and treatment, outreach, and other support services.

The program utilizes a sliding fee scale and assists patients with payment plans. The clinic also accepts Medicare and Medicaid and most private insurances. The program will see patients without regard to ability to pay. Limited dental services may be arranged for patients in need depending upon funding availability.

The new clinic will be open Monday through Thursday from 8 a.m.-4:30 p.m., with later hours available on Thursdays. The clinic will also be open on Friday from 8 a.m.-noon and will serve eligible patients from Powell and surrounding counties.

KRFDC operates a similar HCH program in Estill County where outreach and primary care services are provided within a 40-foot mobile health clinic that sits adjacent to the Estill County Outreach Office. The location in Estill County is also a licensed Substance Abuse Counseling Center and employs a Certified Alcohol and Drug Counselor (CADC) to provide outpatient substance abuse counseling. Transportation may be provided to patients who need assistance.
